

ROKOR PLUS

The ROKOR PLUS is a domestic boiler that can be equipped with a blown air fuel oil or gas burner.

It has a cast iron heating body guaranteed for 5 years and an anti-corrosion combustion chamber, and satisfies all individual, heating needs, in a new or renovated installation.

 **Saint Roch** 
The warmth of your life

ROKOR PLUS

SAINT ROCH hypoeutectic cast iron

SAINT ROCH hypoeutectic cast iron has remarkable mechanical strength and prevents corrosion from starting. Elements of the combustion chamber are assembled in the factory by biconical steel nipples. The ROKOR PLUS boilers with high efficiency (upper to the 90%). The cast iron combustion chamber door pivots right or left and is easy to maintain.

1 Standard burner orifice

2 Right/left pivoting cast iron door

A COMPLETE RANGE

The ROKOR PLUS range includes 6 models 24,5 - 97 kW, so that you can choose the model that corresponds to your installation.

LOW TEMPERATURE

The ROKOR PLUS operates at very low temperature or sliding temperature, so as to optimise operational heating efficiency in different seasons. The boiler remains cold when there is no heating or domestic hot water demand.

REINFORCED INSULATION

The thick insulation (100 mm) on all surfaces, prevents heat losses.

A COMPLETE EQUIPMENT

A cast iron heating body with assembled elements.

The control panel includes :

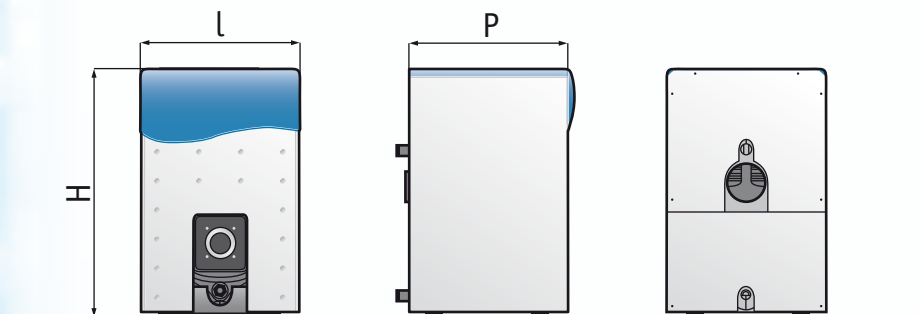

- Circuit for regulator
- On/Off switch
- Summer/winter switch
- Boiler thermostat
- Boiler thermometer
- Safety thermostat
- Pre-equipped housing for regulation
- Burner Euroconnector

BURNER OPTION

Bentone burners are single-piece and silent and perfectly integrates into the boiler for remarkable acoustics comfort, and ease of use.
